

Figures

Figure 1: A line graph showing the relationship between the concentration of a solution and its refractive index. The x-axis represents concentration in g/100 ml, ranging from 0 to 10. The y-axis represents refractive index, ranging from 1.00 to 1.10. The data points show a linear increase in refractive index with increasing concentration.

Concentration (g/100 ml)	Refractive Index
0	1.00
2	1.02
4	1.04
6	1.06
8	1.08
10	1.10
